NEED UP-TO-DATE INFORMATION?

GO TO THE TEMPO FOLDER IN THE COMMON DRIVE FOR ALL YOUR TEMPO NEEDS!!!

TEMPO Scope

The scope of TEMPO has increased to include DAQ Support Services. Teri Weiss, Accounting Technician will be working with CGI-AMS to develop this program. TEMPO will be designed to track approval order and emissions inventory payments. Penalty payments may also be tracked. In addition, invoicing procedures will be improved.

On the Horizon – User Acceptance Testing

The Standard Operating Procedures for each Section will be the guideline for "user acceptance testing". Test data will be input to see how TEMPO accepts it. Basically, "user acceptance testing" will determine if TEMPO will perform the tasks DAQ needs. Any problems found will then be corrected by CGI-AMS.

Spotlight – Bill Munyon, CGI-AMS Technical Lead

Bill Munyan, is a 1998 graduate of Rensselaer Polytechnic Institute (that's in Troy, NY) with a degree in Computer and Systems Engineering. He has spent his employment after college with CGI-AMS. He began his career as a developer with the ProSteward software product. Since joining the TEMPO team, Bill has progressed to the technical lead. He has worked on a majority of TEMPO projects throughout the country. Bill says: "I am basically one of those long-term TEMPO techies, dabbling in most areas of the TEMPO software."

Bill has been married now for about a year and a half and happily telecommutes from just outside of Albany, NY. Bill says he basically works full-time in his pajamas and never actually leaves his own home. Bill lives with his wife, Laura, two "kids", a very mild-mannered golden retriever named Spencer and a rather anti-social cat. As for spare time, Bill thoroughly enjoys cycling, golf, bowling, coffee, wine, and attempting to hold entire conversations using only quotes from movies.

DAQ Hosts TEMPO User Group (TUG) Conference

On March 9 and 10, 2006 the DAQ hosted the TUG conference. The TUG Conference provided the DAQ with an opportunity to network with TEMPO users from other States. Individuals from Mississippi, Maryland, New Jersey, Louisiana, and Kentucky attended.
